# Software without the 'hard bits'

Have you considered how much you're currently spending on the upkeep and maintenance of your server(s)? All of the ongoing costs keep adding up; not to mention the fact that technology seems to be obsolete the minute you buy it in the first place!

If you are a Small to Medium Business, then cloud computing is for you. What is it? Well.. where do we begin? Think of it like water. Instead of having a river out the back of your house, to wash and drink from, there is a company with access to all the rivers, who clean and supply the very best water directly to your house. All you have to do is turn on the tap.

You only pay for what you use, just like getting a water bill at the end of the month. No longer will you have to hire IT staff to maintain your server, backups, keep your software up-to-date and manage anti-virus and computer security. Think of the cost savings on air-conditioning for the server room, extra space on the drives; it's all taken care of for you behind the scenes. All you have to do, is turn on the tap!!

Rapidfire's Software *Xpress* provides hosted Microsoft Exchange™ and Microsoft™ Office Products from as little as \$50 per user per month. It can be deployed and configured in less than 5 business days with minimal interruption to staff and timetables.

## SOFTWARE *Xpress* FEATURES:

-  Automated software and hardware updates, access the latest leading brand software and hardware resources currently available on the market.
-  Secure, robust and reliable 24x7x365 security, backup and monitoring services.
-  Reduced IT expenditure for per user maintenance – scalable support is provided as staff numbers expand and contract.
-  Lower the cost of IT by sharing IT resources with other like minded businesses.

## BENEFITS:

-  Save time, money and resources by giving up the maintenance of your servers
-  Gain control of your IT budget; receive a monthly bill for the services provided and capacity used
-  Secure, robust and reliable service delivery ensures reduced downtime and increased staff productivity
-  Reduced capital expenditure for expensive IT equipment and software
-  Scalable and flexible, giving your staff the opportunity to try new software as it becomes available
-  Enterprise quality disaster recovery and reliability
-  Staff can access from anywhere, all they need is an internet connection

## WHAT YOU RECEIVE

- \* Rapidfire consultants and engineers meet with you to discuss your needs and services
- \* Manage the migration of your existing data and staff user accounts to new cloud based services

### You will receive a Hosted infrastructure and Cloud Solution Proposal that includes:

- \* Business process review and current situation analysis
- \* Custom designed package to suit your needs, including hosted online services (Microsoft™ Exchange, SharePoint, Live Meeting and Communicator)
- \* A once off fixed project management fee to establish the new services and migrate your existing data
- \* Ongoing support, reporting and services that fit with your needs for a fixed monthly fee

## EXCHANGE ONLINE

Employee access to email, shared calendar, shared tasks and contacts from virtually anywhere they have internet access, on desktops, laptops, and mobile devices with internet access.

- Lower cost 'deskless worker' licences available for workers who use email on a limited basis
- Ability to be rapidly deployed, flexibly expanded and securely administered

## SHAREPOINT ONLINE

Provides a central online location to share documents, locate resources, manage workflows and maintain project oversight which can be accessed via almost any compatible broadband enabled device. In-built collaboration capabilities to enable teams to flexibly and efficiently collaborate – microsites, portals, team workspaces, emails, presence awareness and web-based conferencing. Lower cost 'deskless worker' licences available for workers who need to access company information but who don't need to create or edit information.

## OFFICE LIVE MEETING

Employees can connect and engage with individuals for online meetings or large groups of up to 250 users for large scale events with just a PC and an internet connection.

- Easy integration with Microsoft Office, including internet access, to enable remote meetings
- Interactive application/desktop sharing and whiteboard tools add dimension to online meetings
- Integrates into Communicator & Outlook

## OFFICE COMMUNICATIONS ONLINE

- Instant messaging with text based chat.
- Presence awareness, enabling users to check another user's availability on the network

"Cloud computing represents the next frontier"

Steve Ballmer, Microsoft CEO

Rapidfire Cloud Computing - Software on tap.
